Education

2015.08–2018.05	Master of Design	DAAP College of UC(Cincinnati)	Award
1998.09–2002.07	Bachelor of Industrial Design	ShenYang Aerospace University	Scholarship of half tuition Excellent Student of Province

Experience

 2016.05–2017.05	IDO of GE Appliance Design Intern Work on design research and design project with design managers	Achievements Minimal Kitchen Design Compact Kitchen Design Front-load Laundry Design
 2013.01–2015.07	PIT China of Samsung Design Manager Lead NCD projects of consumer electronics products. Work with multi-discipline team from Interior R&D team, marketing team and LRL team, to outside research and design agency; Deliver advanced breakthrough product concepts and design for future markets	Family TV Feature Cyclone Air Purifier Exposed AC Air Purifier
 2010.06–2013.01	Global Consumer Design of Whirlpool Lead Designer of OEM project Work with global GCD team in design projects for OEM/ODM business and set up the OEM design studio together with the GCD Asia Director.	Global Split AC Series Design Top-load Washer Design
 2002.08–2010.05	Design Center of Haier Group Senior Design Manager Oversee design projects for two product categories - Air-conditioner and SDA . Make the design strategy, plan the roadmap of product and design projects, lead design research and design activities	Red Dot Design Award 3-Door Refrigerator Design Front-load Washer Series Design Water Heater Series Design Microwave Oven Series Design

Skill

Solidworks, Fusion360, UG, Keyshot
Illustrator, Indesign, Photoshop, Premiere, Aftereffect
Sketch, Framer, XD, Processing, P5
Behavioral/attitudinal research for exploratory and generative goal

Objective

Design is the bridge between the technology and consumer and marketing helps consumers to find and choose the bridge for better life. Journey of finding the next right design is accompanied with uncertainty, randomness and also occasional failures. I love this type of journey and enjoy the wow-moment of breaking through. I'm attracted to the process of probing on something unknown and excel at finding new opportunity or solution. Any design project involving both physical product design and digital interaction design will be my dream job to which I'm willing to devote all my hearts and efforts.

Hobbies

Road trips, hiking, and sports games like table tennis, badminton and pool game are my favorite for free time. Football and Basketball are also something fun for me to watch.
